

# POOL/PACT MSDSonline Member Account

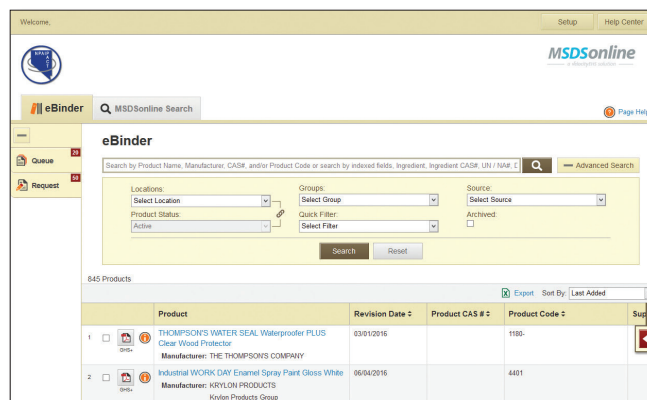

The POOL/PACT MSDSonline Member Account provides unlimited access to MSDSonline's industry-leading safety data sheet database, plus the tools you need to help ensure compliance with HCS and GHS alignment.

## MSDS Management & HazCom/ GHS Alignment

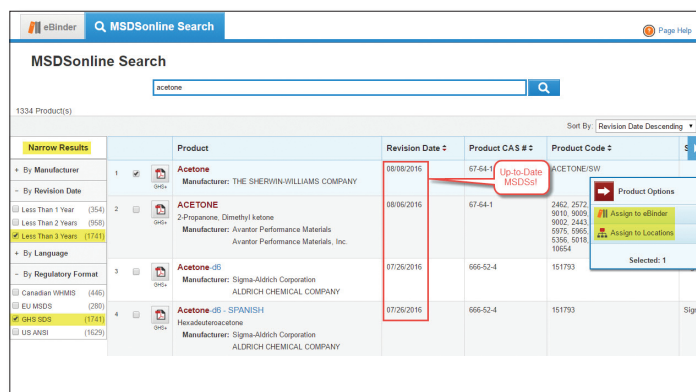

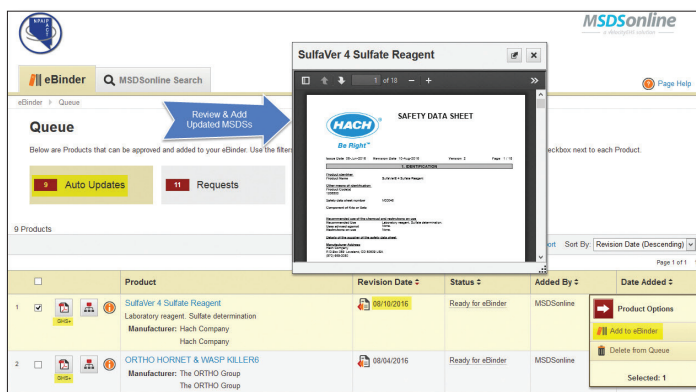

As a safety professional, you're often asked to do a lot with few resources. Tasks like managing safety data sheet binders take time that could be better spent on other important safety issues. What's worse, managing these programs using paper-based methods is costly, cumbersome and often leads to noncompliance with HCS, OSHA's second most frequently cited violation.

Your POOL / PACT MSDSonline Member Account is a powerful solution to help you build and maintain a compliant electronic safety data sheet library that your employees can access anywhere there's a mobile device, and take charge of your HazCom compliance initiatives.

You get a robust, cloud-based suite of tools for building and organizing your safety data sheet library, which saves you time and money. . . and eliminates the headache of paperwork.

Online Safety Data Sheet Access	MSDS Library Management	Auto Updates for Your Library
<p>The POOL/PACT MSDSonline Member Account is a cloud-based system that gives you unlimited access to MSDSonline's industry-leading online database, containing millions of manufacturer-original safety data sheets. You can stop wasting time searching multiple websites or calling manufacturers to obtain missing or out-of-date MSDSs. And if we don't have a specific safety data sheet, you can use the request tool, and we'll contact the manufacturer to request it for you.</p>	<p>Your Member Account provides a suite of basic MSDS management tools across multiple PC, laptop, and mobile device platforms that allow you to assign chemical-product MSDSs to site-specific locations or to customizable groups for easier management and simplified reporting. What's more, you can also assign synonyms or create custom keywords to help you quickly sort your inventory and find product MSDSs.</p>	<p>The MSDSonline Auto-Update feature lets you know when an updated safety data sheet is available, which is especially useful for workplaces still transitioning to GHS. You will be notified by email when a new revision of an MSDS in your electronic library (eBinder) is available. These updated MSDSs will be held in a special holding pin (Queue) for you to review and ultimately add to your eBinder ensuring your MSDS library is up-to-date.</p>

Auto Updates For Newer SDS Versions!

### Millions of Safety Data Sheets at Your Fingertips

24/7 access to the industry's leading database of safety data sheets helps ensure your company's SDS library is complete, up-to-date and in compliance.

### Simply Compliance

Easy-to-use tools help you meet key requirements of hazard communication including hazard determination, right to know access, labeling, safe chemical handling, PPE and more!

### Low Cost of Ownership

There's no software to install or maintain and you get immediate access to new features and enhancements!
